How we won the Gold Travelife Award!

- Our staff monitor their energy-use, water-use and waste and are taking steps to reduce them and encourage school groups to do the same.
- Wherever possible they use local suppliers for produce and are currently growing their own kitchen garden.
- They've installed a recycling facility in the chateau grounds in partnership with the local council; this is the first of its kind in France and they can be fined if they don't separate properly.
- Our groups are encouraged to plant a fruit tree in the Eco-Avenue. Not only will this help the group off-set the carbon emitted on their trip, but one day these trees will provide fruit for the chateau kitchen, cutting down our food mileage.
- Low-energy bulbs are being put in place throughout the chateau.
- Pretty soon, all of our tours to the Chateau will be entirely carbon-neutral, something no other school travel company can match.
- School groups undertaking our new Sustainability & Global Awareness tour will be encouraged to recommend further changes to be undertaken by the chateau team.
- We are committed to a process of continuous improvement in our eco-friendly performance.
